

Anton Bobrovskij

Senior Product Designer

33 years old

12+ years
of experience

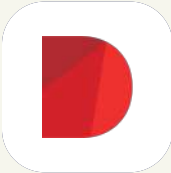

Vilnius, Lithuania

English, Lithuanian, Polish, Russian

At work

With 12+ years in UX/UI and 7+ as a Senior Product Designer, I have gained a lot of experience in user research, prototyping, interaction design, and usability testing. I ensure seamless collaboration between design, development, and business goals, leveraging Figma, research, and analytics to refine user experiences.

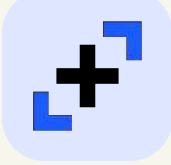

I also work **AI-natively**: tools like Claude Code and Figma AI are part of my daily process, letting me move from prototype to working product without waiting on a handoff.

I'm currently a **Senior Product Designer at Diligent**, the GRC platform 25,000+ organizations use for governance, risk, and compliance - working on its entity management suite, from record-keeping to report generation.

I've spent 6 years designing complex dashboards for **SameSystem's** retail management platform, creating intuitive interfaces for HR functions and data visualization - and was responsible for the full design of their **iOS and Android apps**.

For over 2 years, I was the sole freelance Product Designer for **www.teamhood.com** (Lithuanian project management tool), designing intuitive interfaces for complex systems.

Started my career as **the only designer at Omnisend** (upcoming Lithuanian unicorn).

Outside of the work

I have organized group tours for up to 10 people to **Kazakhstan, Chernobyl Exclusion Zone, Morocco, Albania, Portugal, and the French Alps**.

Four wheels are cool, but **two are even better!** I'm a motorcycle enthusiast

After a hard work week, the best way for me to relax is a **padel match** with my friends.

2025 Jun - Currently
